

LETHAL FORCE SIMULATOR

Lethal Force Simulator - The simulator is designed to expose the student to real-life scenarios, and allows the student to see how they would react should they be confronted by a threat. Multiple scenarios are presented to the student followed by an after action debriefing to discuss what they did and what they could have done differently. The students will NOT be using live ammunition during this course. SIRT Laser pistols and CO2 loaded firearms are used in the training. The objectives achieved in these exercises will allow the student to see their strengths and weaknesses.
